profile

The company specializes in the production of furniture in room suits and other individual pieces of furniture (wall units, chest of drawers, cupboards, cabinets, bedroom suites, library furniture, dining room suites, dining tables, coffee tables) made, inter alia, of natural wood, such as beech, oak, alder, birch, but also of natural veneers – black walnut as well as chipboard and other.

Dekort's furniture collections make a brand of innovative ideas, modern technologies. From the beginning of its existence the company focused on furniture quality. We use high quality materials in the production process, in the technological processes we apply substances that are not harmful to health and the environment – we use a variety of surface finishes: varnish, oil and wax. Dekort also produces furniture per individual order. Dekort furniture features a very wide variety of hotel, restaurant, cafe furniture, and furniture for other public utility facilities. Its functional qualities, modern and original appearance are the factors contributing to the furniture huge popularity. It needs to be emphasized that a Client can influence the final form, dimensions, colour, etc. We offer ready designs; we prepare technical documentation and following your approval we manufacture and assembly furniture for You.

upholstered furniture, sofas, armchairs, puffs, corner sofas, seating boxes, bar stools, designs per order

Lege artis is a design-production company offering two furniture collections: SUSZEK and Lege artis. Both of them have been designed by Jacek Wojciech Suszek. The product offer is constantly diversified and extended by new products. The products on offer include: Lege artis collection furniture (sofas, corner sofas, armchairs) 20 designs, Furniture collection of Suszek Exceptional Forms (sofas, corner sofas, armchairs) 14 designs, furniture designed for individual orders for different companies, as well as public utility institutions, restaurants, offices, etc. "Lege artis" collection satisfies high standards of manufacture and ergonomics. Additionally, furniture frames are made of black steel, solid wood, blockboards, wooden plywood, while steel feet are made of high grade stainless or black steel finished in a process of chrome galvanization with a bright polish or satin chromed. The collection "Suszek Exceptional Forms" features furniture of unique designs. Products from this collection come in unique forms and modern design. The collection is decorated with bright polished or matt high grade stainless steel. High quality grain leather of Italian origin and fabrics are used for upholstering furniture. Lounge furniture manufactured by Lege artis is modern in form. It is made of high quality materials, while the process of its manufacture links traditional, manual craftsmanship with modern technology of production. Both collections are distributed by galleries and furniture stores, but their promotion in the European market, apart from the usual exposition, is also conducted in cooperation with lead architects and interior designers. Aside the designs featured in our regular offer, we also realize atypical, individual orders, taking into account the characteristics of particular public utility facilities: hotels, guest houses, offices. In our work we use the long-term experience of our designers in creating furniture designs and interior decoration. Our priority has always been good design, which means not only a beautiful design, but also high quality manufacture and comfort. We also make sure we provide reliable logistical services and short lead-times.

chemical agents for paper industry

Petrofer is a German company that produces over 900 chemical products. Various products of Petrofer and their technological processes can be used in different branches of industry: hardening technique, metalworking, steel and aluminium rolling, greasing and hydraulics, corrosion protection, paper cleaning and production. Additionally, Petrofer offers special products for other uses. Highly-developed products are the result of continuous research conducted in Hildensheim Research-Development Center. The company has implemented a quality assurance system certified according to DIN ISO 9001.

profile

dispersive, offset and UV lacquers, CTP systems, offset cylinder dressing, printing chemical agents, printing inks

WAB was established in 1995 and since then it has been supplying printing houses with printing consumables. It built an offset and UV inks mixer in 2002 and UV and a dispersive and UV lacquers plant in 2005. Thanks to these investments the products are offered at competitive prices and quality control department guarantees high quality production.

Regional Investor Assistance Centres (COI)

They are partners of the Polish Information and Foreign Investment Agency (PAliIZ) at the regional level. The Centres provide consultancy and information services for business entities considering investment projects in a particular area. COIs also provide dedicated service and investment guidance, including post-investment support within the voivodeship where the project is located. The network of COIs has been created in conjunction with the Marshals of Voivodeships who are statutorily responsible for economic promotion of the region.

Investor Assistance Offices (BOI)

The Offices, based in City Councils, undertake actions to stimulate the city's economic activity. They provide direct support and assistance to investors who wish to locate their investment projects in a given municipality. They also draw up and update the city's investment offer by cooperating with other local government units.
