OPOLSKIE
FLOURISHING OPOLSKIE REGION

Opolskie – European Region in Poland

The current situation in the region has been determined by the history of the Polish, Czech and German borderland. Today's Opole Silesia is a multi-cultural place, which, for generations, has been inhabited by people who cherish their traditions and work together for the development of their homeland. This cultural diversity has resulted in the extensive experience of the voivodeship's residents, as well as their tolerance and open-minded attitude to the world, which, combined with their hard work ethics and motivation, constitute the best capital for each employer.

The voivodeship's regional and local self-governments have proved to be good managers for years, investing in modern infrastructure. Attractive investment sites have been provided around the A4 motorway and Opole is one of the most robustly developing university cities in Poland. We not only create ever better living and leisure conditions, but, most of all, support the activities of all those who contribute to an increase in our economic potential.

Automotive cluster Silesia Automotive

Silesia Automotive, a networking initiative in the Automotive sector in Southern Poland which facilitates cooperation between over 250 entities from three neighboring regions (Silesia, Opolskie and the Małopolskie Region), which include: enterprises (vehicle manufacturers, producers of motors and other car parts, components and systems), Universities of Technology such as the Silesian University of Technology, Czestochowa University of Technology, University of Bielsko-Biala, Scientific entities such as the Institute of Non-ferrous Metals, Institute for Ferrous Metallurgy, Institute of Welding in Gliwice (Polish Welding Centre of Excellence), Technical schools, Specialized service suppliers.

The activities of Silesia Automotive are focused around two main issues:

- human resources & labor market
- innovations (new materials and engineering solutions).
-

The actions that are taken include:

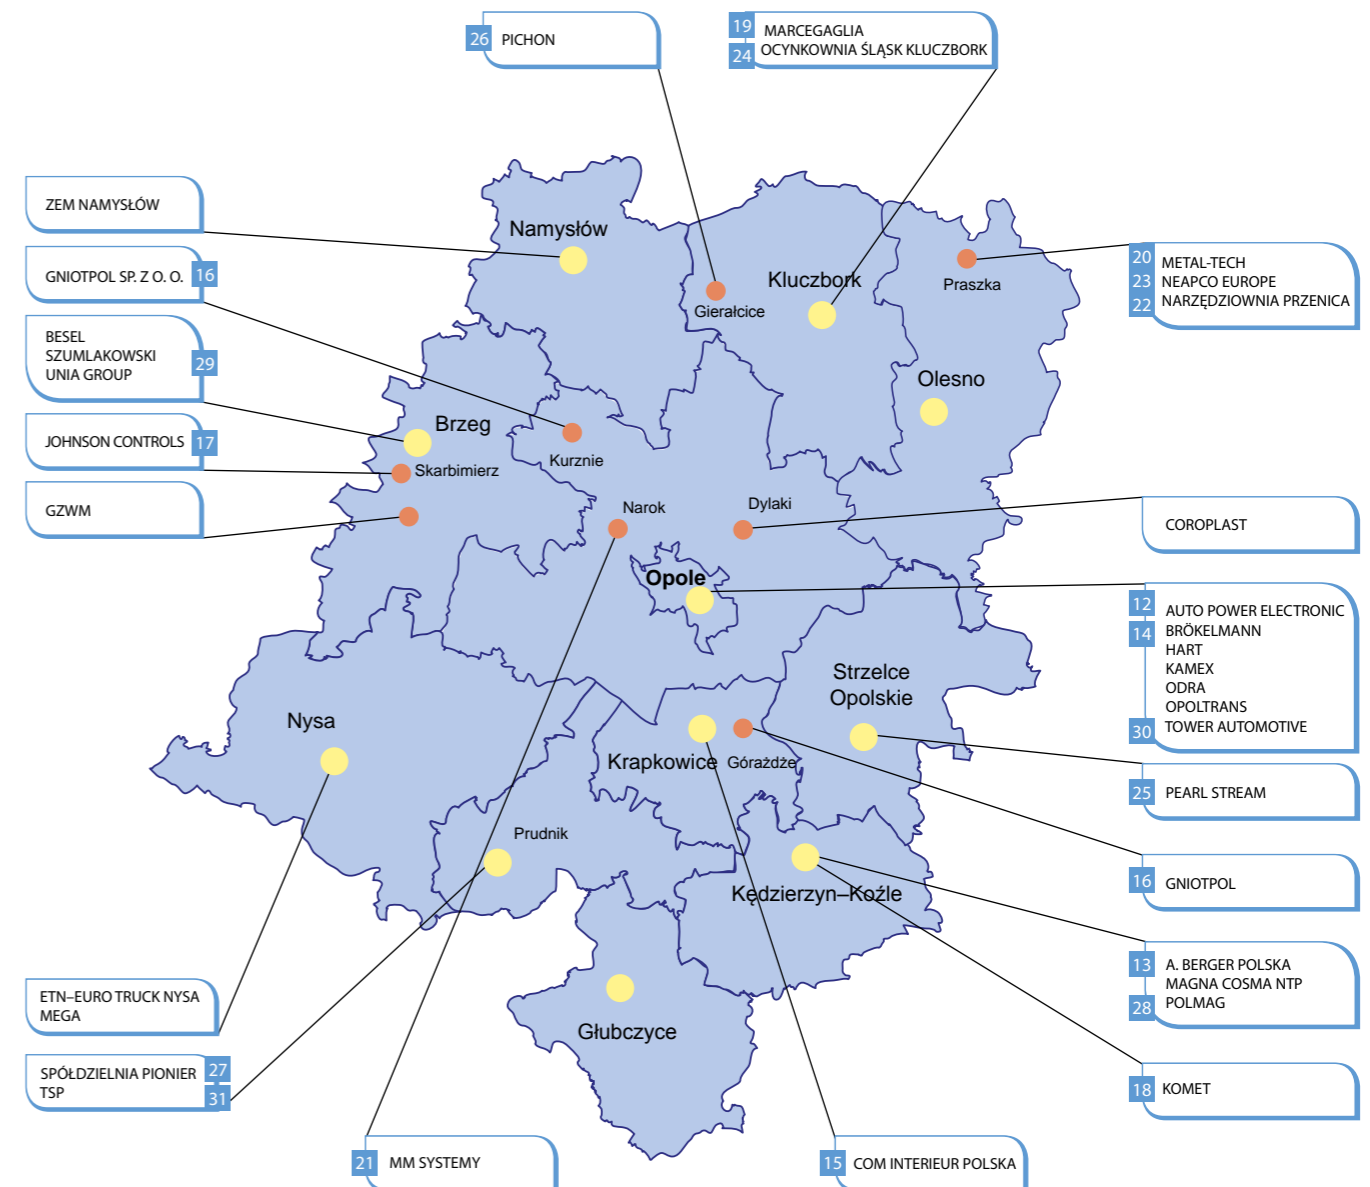

- running periodical surveys and analyses
- organizing workshops for HR and production managers, technical specialists
- organizing meetings on the exchange information and solving problems
- supporting development projects.

Founded and owned by Peter Skrobotowicz, AUTO POWER ELECTRONIC is a Polish private manufacturing company operating in the automotive industry since 1984.

We specialize in the production of automotive electronics and electrical engineering. Our electromagnetic actuators with patented solutions and various relays and controllers are used in vehicles and machines worldwide.

We use materials and components from reliable and recognized Polish and foreign producers. We utilize modern manufacturing equipment and have developed our own design office, while our innovative research allows us to offer a wide range of different solutions.

Customers

John Deere, DEUTZ AG, MOTORPAL, Zetor, KAE.

Our company has a Supported Employment Enterprise Status (Sheltered Workshop), which means that our business partners can enjoy additional benefits in the form of payment reductions. In this way our company not only offers its partners significant savings but also supports the employment of people with disabilities.

Brökelmann Polska Sp. z o.o.

In October 2011, the company began to render services in the area of precise aluminum processing at a new location in Opole.

Products

Apart from precise machining of complex shapes, our company also provides services in the scope of comprehensive preparation of all kinds of machines, including specialized equipment for metal processing satisfying design and customer requirements. Moreover, we perform precise measurements with the use of a coordinate measuring machine with 3-D control, as well as measurements of surface roughness. In order to improve our products and services, we have implemented the Quality Management System: ISO 9001:2008.

Customers

The majority of our orders come from our parent company, F.W. Brökelmann Aluminiumwerk GmbH & Co. KG and are placed from the biggest companies from the automotive industry. At present, the company employs 42 employees, however we are constantly increasing employment and continuing the development of our company.

Johnson Controls

Johnson Controls

In Skarbimierz, 31 miles (50 kilometers) southeast of Wrocław, KEIPER (part of Johnson Controls) started manufacturing front seat structures for passenger cars at the beginning of the third quarter in 2009. The new facility with 19,000 square meters of floor space was officially opened on the 100,000 square meters site on September 2, 2009. In addition to the production area for assembly and painting the site includes offices along with logistics and storage space. The new site is situated close to the A4 highway between Wrocław and Kraków, 31 miles (50 kilometers) from Wrocław Airport.

Products:

Seat structures, subcomponents, assembly frames, vehicle seats.

Customers:

Lear Corporation, Camaco, Seatcon, Daimler, Opel, Renault, Chevrolet

The Marcegaglia manufacturing facility in Kluczbork, Poland was inaugurated in 2010 and is mainly dedicated to the production of carbon steel welded precision tubes for a wide range of applications. Marcegaglia Kluczbork also hosts a service center for strips and sheets.

The facility spreads over 80,000 sqm of covered surface devoted to manufacturing and storage, within an overall area of 450,000 sqm. It currently hosts 6 tubing mills working from hot rolled, cold rolled, pickled and galvanized carbon steel, 2 coil slitting lines, as well as a packaging line for strips and 2 cut to length machines for sheets.

The manufacturing system in Kluczbork is efficiently equipped to deliver just in time tube products to the market, assisted by a well-established pre-sales and after-sales service. The large warehouse area allows the plant to serve as the main logistics hub for the complete range of Marcegaglia flat and long products for the Central and Eastern European markets.

The plant in Kluczbork has been added to another plant in Poland based in Praszka where Marcegaglia has located its production of insulating panels, condensers and heat exchangers and, since 2012, a new production of steel handles for broom and DIY.

Products:

tubes, profiles, strips and sheets - condenser, sandwich panels, brooms handles

MM Systemy Sp. z o.o.

As a medium-sized family-run group of companies based in Wenden in Süd-Westfalen Deutschland we have continually expanded our manufacturing capacities to the extent that we are now able to offer our customers fully integrated and optimised solutions from component design right through to large batch production. We have a reputation for flexibility and reliability, and a wealth of experience in our core areas of expertise of metalworking and welding.

2012, the company MM Systemy Sp. z o.o. was established as a subsidiary of Muhr group to expand the scope of action in Eastern Europe. Based in Opole Katy near the city of Opole in the triangle of Poland-Czech Republic-Slovakia we can respond to the local needs of our customers even better, are in the immediate vicinity of production facilities and speak the local language.

In the spring of this year, preparations began to shift a 400 tonnes Beutler press which was completed in May. Since June, the company MM Systemy provides the first self-produced stampings.

As suppliers to the automotive industry we concentrate on the following:

- Production of cutting and drawing dies
- Series production of pressed steel and aluminium parts which are processed into welded assemblies
- Production of strut braces
- Manufacture of seats for special-purpose vehicles

Our satisfied customers:

- Benteler Automobiltechnik GmbH
- BMW AG
- Continental AG
- Daimler AG

NARZĘDZIOWNIA
BOGDAN PSZENICA

The history of NARZĘDZIOWNIA dates back to 1997. The company was established on the basis of the knowledge and experience gained by the owner during his 20-year-long practice in tool shops at various enterprises. The company's technological development is based on state-of-the-art, innovative solutions that are applied on global machinery and metal working software markets. The know-how developed throughout the years allows us to fully and effectively make use of the available machinery. The company's main pillar is its highly qualified staff, whose knowledge and practical skills allow the execution of even the most complex orders.

Products:

- Die-casting moulds (up to 20 tones),
- Casting tooling: trimming dies, core boxes, permanent moulds, cores,
- Cores with special internal cooling,
- Reconditioning and repair of damaged/worn parts of casting tools.

Customers:

SPÓŁDZIELNIA PIONIER

In the 60's the company began to operate in the metal industry and established cooperation with the Commercial Vehicle Factory in Nysa. The early 70's mark the beginning of cooperation with other automotive plants: Truck Factory in Lublin and the Car Factory in Tychy.

Specification and products:

The company deals with the production of pressed metal components, such as caps, grips, holders and assembly parts for the automotive industry. Its offer also includes powder coating of its own elements and other items, such as car driving axles, as well as welding of components and production of plastic parts with the use of welder points machines and injection molding machines. It also provides subcontracting services for car and other transport equipment manufacturers. In terms of reciprocal production, the company offers manufacturing of metal, plastic semi-manufactured products and finished products.

The company POLMAG is a modern light-metal diecasting foundry. Polmag specializes in magnesium diecasting and machining of magnesium components. The company offers also service and support in part and tooling design and construction. One of the assets of this company is a specially designed technology of coatings, and continuous development of typical decorative and technical corrosion resistance coatings.

Specification and products:

Polmag's foundry currently runs 6 production cells with use of cold and hot chamber magnesium diecasting machines (clamping force 200 to 1000 tonnes), trimming presses, machining centres, grinding stations and a quality laboratory (3D measuring machine Zeiss Contura G2RDS). Polmag is a supplier of magnesium components for automotive industry (covers, housings, frames), electronics (housings, frames), power-tools (housings, base plates, covers), and for hardware / building industry (door- and window handles, window hardware, bolts, lock housings).

Why Opolskie?

Choosing Opolskie for the location of our company was not accidental. The main advantages of this location are its excellent infrastructure – it offers three kinds of transportation means: road (access to A4 motorway, fast access to borders of Germany, Czech and Slovakia), river (Gliwicki Channel and Odra River), and rail (rail sidings available by the factory); access to maintenance services and manufacturers of die casting machines located in the Opolskie Region; and presence of many companies related to our industry, which provide services and deliver products.

SALES of new, used and repaired road tank trucks.

PRODUCTION of autotank trucks, semi-trailers and trailers for dangerous materials.

CARRYING supervision examinations, reconstruction of technical documentation that is required by TDT (Transport Technical Supervision).

REPAIRS of pressure and pressure-free tank trucks for transportation of dangerous materials, loose materials and foodstuffs.

CURRENT and after-accident repairs of tank semi-trailers and auto tank trucks..

MODERNIZATION of tanks of road tank trucks in accordance with DT and ADR:

- design and assembly of hermetical systems for road tank trucks
- assembly and servicing of ABS systems in all vehicles
- modernization of suspension systems and alteration of suspensions into pneumatic ones
- fittings of distribution systems from legalization
- spraying tank trucks in a dust-free chamber
- replacement of chassis in semi-trailers tanks according to the approved European certificate (homologation).

We manufacture tankers for transportation of liquid hazardous materials subject to provisions of ADR and tankers for liquid neutral materials. The product range is very wide, we produce semi-trailers tanks, trailers tanks and road tankers to transport of every possible medium in liquid form, with the capacity, technical specification and the equipment according to customer needs and existing regulations.

The highest quality manufacturing process involving on advanced technology with the use of the highest quality materials, experience in manufacturing and large production range of tankers are a perfect combination, which allows us to best respond to the expectations of clients.

Tower Automotive Poland

Spółka z ograniczoną odpowiedzialnością S.K.A

Tower Automotive is one of the largest independent global suppliers of automotive metal structural components and assemblies. It serves virtually every major automotive vehicle manufacturer, providing a broad range of metal structures - from stampings to complex body and frame assemblies. Tower Automotive Opole produces metal stampings and welded assemblies for popular car models, such as Fiat 500, Opel Astra and Ford Ka.

Manufacturing Capabilities:

progressive presses: 630T and 1000T; automatic robots cells, spot, welding and handling robots, tube bending line, powder painting line

Customers:

Fiat, Skoda, VW, GM, BMW, Audi, Suzuki
