opolskie region

OPOLSKIE
FLOURISHING OPOLSKIE REGION

Opolskie region – European region in Southern Poland

Opolskie voivodship is a region that draws its strength from a multinational heritage. The most important trade routes in Central Europe crossed there their paths for centuries while local traditions were shaped by Germans, Poles and Czechs.

This extraordinary geographic position on the crossroad of different paths of cultures has a strong influence on the region from the economical aspect. Residents of Opolskie stand out for their diligence, commitment to tradition and openness to the world. Businesses generally praise the high level of work ethic, education and involvement of employees in local companies. A relatively high German minority (about 10% of the total population) also means a better connectivity to German, Austrian and Swiss markets.

Local administration and authorities have been successfully attracting investors in these years and are currently developing necessary infrastructure to attract even more. Attractive investment areas are available along A4 motorway, linking Opole with Wrocław, Katowice and Kraków, as well as the markets of Germany and Ukraine.

Opolskie voivodship enjoys a reputation among foreign investors, particularly in the food processing, chemical, metal hardware and construction sectors. According to recent analysis by Deloitte, the region can expect new investment projects in the automotive, engineering, food, glass, chemical, paper and R&D sectors.

The region is renowned for its high life standard and flourishing academic center. Local residents and investors have a wide choice of active leisure and resting options.

Furniture industry in Opolskie region

Furniture industry is an important pillar of Polish exports. In 2013 Polish manufacturers of furniture registered exports in the amount of 6.9 mld € with EU market being by far the most dominant importer (84%). One of the key centers of domestic furniture industry is located in Opolskie voivodship. Local traditions of furniture manufacturing go backward 200 years. One can here find family-managed companies that have been in the business since several generations.

Located 45 km from Opole, the small town of Dobrodzień is regarded as the regional industry center and is recognizable not only in Poland but also in Europe. Companies such as Kler, Lissy, Mebel Rust and DES have their operations here. Dobroteka also operates in Dobrodzień – selling products of several local brands under one roof and in the same time running R&D activity in the field of interior design. Dobroteka is an example of successful cooperation of local furniture manufacturers, contributing to the growth and recognition of this key sector of Opolskie voivodship.

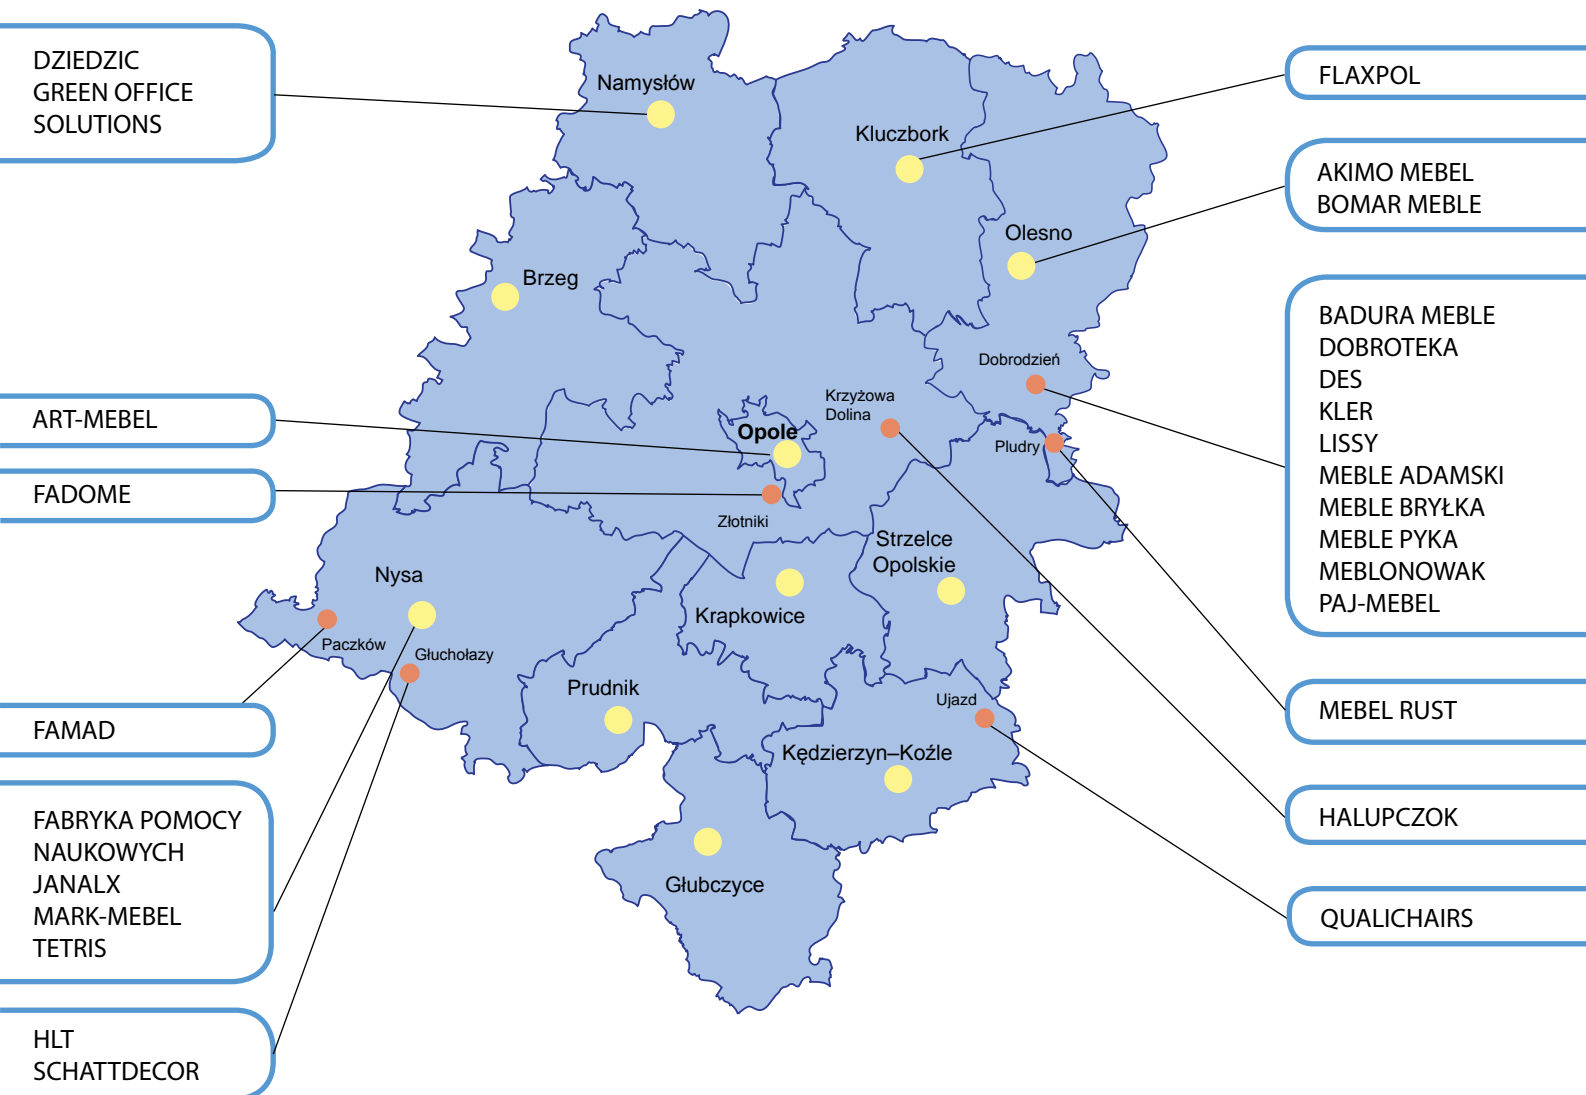

The sector has a wide range of support in terms of R&D and educational institutions. Universities of Opole, Gliwice and Wroclaw ensure a steady supply of skilled engineers, technologists and designers. In Opolskie voivodship there also functions Silesian Cluster of Woodworking, bringing together 51 representatives of industrial, scientific and R&D provenience. In 2013 at BUD-ECO fair the cluster was awarded a Grand Prix for its achievements in the wood-working field (modifying the properties of wood using heat and steam).

Furniture industry in Opolskie voivodship is supported by a well-developed road and rail infrastructure, as well as by a favorable geographical location in the middle of Europe, which simplifies the logistics chain and reduces the cost of transporting the goods to customers.

Mebel Rust

Mebel Rust started operations in 1968 while since 1980s has been specializing in the field of custom-made kitchen furniture sets, making the company one of the most experienced domestic manufacturers in this sector. Political changes during late 1980s brought dynamic development. In the 1990s, the company started up a new production facility in Pludry. Further investment for upgrading machinery and increasing space for manufacturing operations took place in 2008. The company operates in the segment of medium and premium products, offering customers articles which combine contemporary design, innovation, performance and attractive price. The company focuses on combination of manual work and modern machinery made by Homag, IMA and Cefla.

Products

Currently, the company offers three product lines: ELEGANCE, SENSUAL and Avant-Garde. Tailor made solutions based on these products are available.

Meble Pyka

Meble Pyka is a furniture manufacturer operating on the market since 1978. It started as a garage-based production company. With time it grew into a full-grade enterprise present on domestic and foreign markets. It employs specialized staff and implements most modern production technologies. The company uses high quality components guaranteeing long-term durability of the final products. It steadily invests funds with the objective of improving production quality and offer its products at more affordable price.

PHUP J&H ZIEMBA

The company has been operating on the market since 1984. Initially specialized in the field of wooden toys manufacturing, it gradually expanded onto wooden furniture segment. The company recently built a new production hall with an area of 650 sq. m. It has been a long-time commerce partner of Cepelia, a domestic trading company dealing with polish folklore decorative products. The company boasts the KLON (polish name of MAPLE) reward for implementation of technological innovations, granted by Bank Ochrony Środowiska and a medal from Polskie Towarzystwo Dzieci's management.
