Its staff consists of 50 employees, all of whom were hand-picked, and possess vast experience and great qualifications. This human factor allows the company to perform very difficult operations and services at a superior level.

A close-up photograph of an industrial laser cutting process. A dense, chaotic web of bright orange sparks is being ejected from a cutting head, which is partially visible on the right. The sparks are long and thin, creating a sense of intense heat and motion. The background shows various industrial components, including metal plates and a large, light-colored cylindrical part. The overall scene is dimly lit, with the primary light source being the sparks themselves. A solid red rectangular box is positioned in the upper center of the image, containing the text 'Suppliers of fasteners' in white. A solid grey rectangular box is located at the bottom center of the image.

Stalowa Wola Steelworks is a producer and supplier of military equipment with the longest in Poland experience in defense industry, as its first production dates back to 1938. The Steelworks specializes the design, building, production and sale of military equipment. The Steelworks is proud to deliver product solutions which combine the following: they meet purchasers' expectations, are worked out by constructors and engineers, implement unique solutions, are high quality and accompanied by good post-sale service, are system solutions in terms of ready-to-use military equipment modules. Stalowa Wola puts to good use its 70-year long experience in the special production sector and offers cooperative services – products and technical services are created and delivered following a custom-made documentation drawn up by the company specialists or entrusted customer specification.

profile

oil field equipment and mobile oil field units; custom electronics – measurement, control and data acquisition systems

EUROTECH focuses on design and manufacturing of custom-made high-tech products and systems, including: oil field equipment for exploration, stimulation, workover and exploitation of natural oil and gas; custom electronics – measurement, control and data acquisition systems. Thanks to the cooperation with companies from the USA and Canada, EUROTECH supplies quality units and equipment to customers in Poland and Eastern Europe. One of the priorities set by the company is constant development through participation in R&D projects followed by implementation of R&D findings, in particular new technology. Focusing on individual customer needs enables the company to introduce innovative solutions with great success. EUROTECH's experienced team provides full service, from conceptual design through production to maintenance and service.

Regional Investor Assistance Centres (COI)

They are partners of the Polish Information and Foreign Investment Agency (PAIIIZ) at the regional level. The Centres provide consultancy and information services for business entities considering investment projects in a particular area. COIs also provide dedicated service and investment guidance, including post-investment support within the voivodeship where the project is located. The network of COIs has been created in conjunction with the Marshals of Voivodeships who are statutorily responsible for economic promotion of the region.

Investor Assistance Offices (BOI)

The Offices, based in City Councils, undertake actions to stimulate the city's economic activity. They provide direct support and assistance to investors who wish to locate their investment projects in a given municipality. They also draw up and update the city's investment offer by cooperating with other local government units.
