Media reports

Witness Asia's healthcare transformation and create unprecedented opportunities with global healthcare players

The President of R.O.C. (Taiwan), Ing-Wen Tsai

Taiwan Healthcare+ Expo is the pioneering achievement for Taiwan healthcare community! We have three incomparable advantages: Cutting-edge healthcare technologies, Complete tech industry supply chains and Outstanding biotech/pharmaceutical industry capabilities.

Founder of the Expo, Jin-Pyng Wang

It has been become one of amazing international level Expo. It catalyzed the active collaboration between hospitals and industries to build healthcare supply chains with scale, developing it into one of the most advantages in Taiwan.

President of the Legislative, Yuan Jia-chyuan Su

This is the first time the government ministries have completely dedicated itself to collaborating with the medical industries and private organizations to make it a truly national level exposition. We will be the pillar of support for the medical technology industry.

Minister of Health and Welfare, Shih-Chung Chen

In 2019, we will integrate Taiwan's most significant international conferences and events to form a week of medical technology, so international leaders can secure opportunities to establish connections or cooperation with Taiwan at once.

Taipei Mayor, Wen-Je Ko

Taiwan Healthcare+ Expo represents the combination of technology revolution and professional medical humanism. It is also a demonstration of the fruits from more than two decades of work and dedication by the Taiwan medical community.

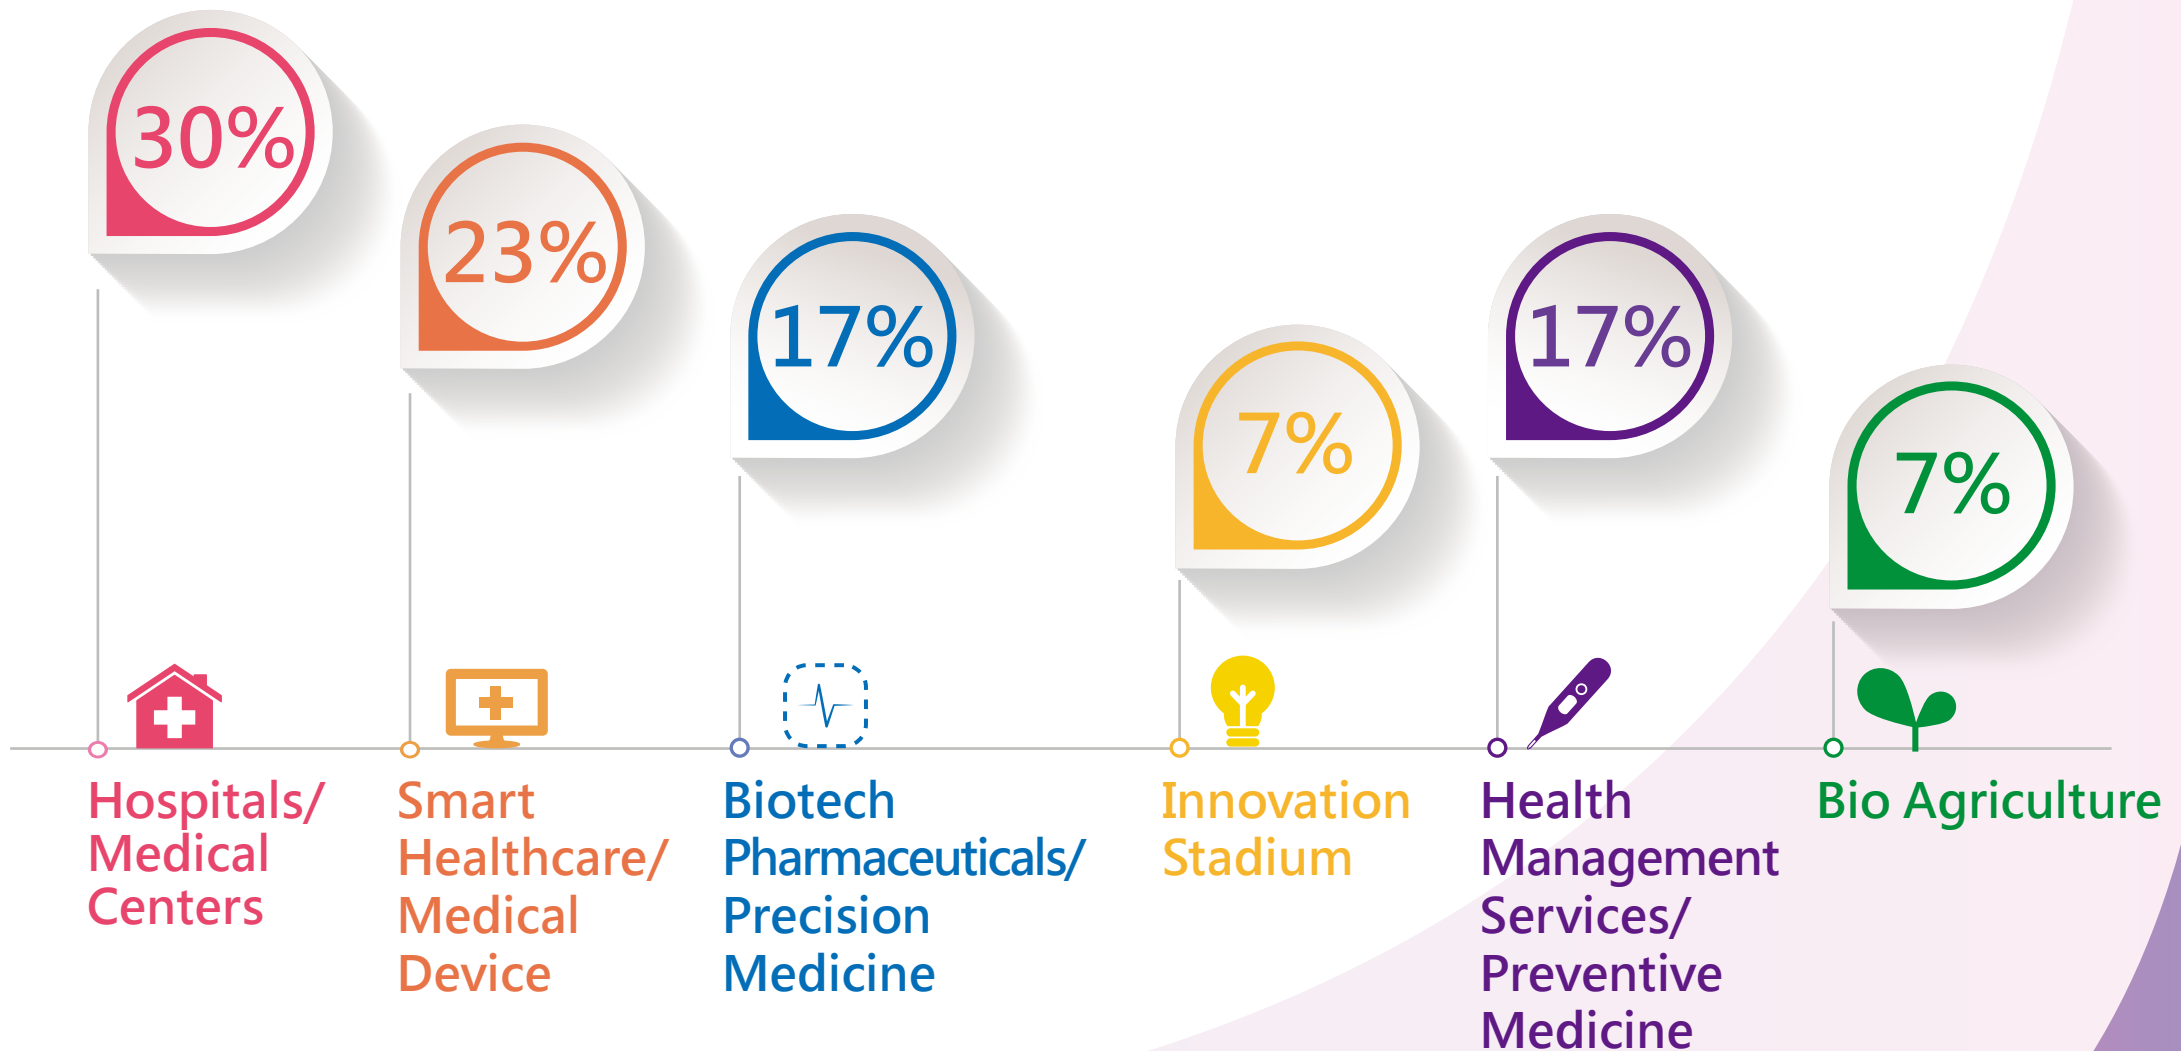

International Recommendation

- The chairman of the World Medical Association (WMA), Leonid Eidelman
“Taiwan for the last 20 years had great progress in this field (Health Service).”
- The CEO and President of Israel Advanced Technology Industries (IATI), Karin Mayer Rubinstein
“I can bring to the table to Israel more collaboration and nourish the collaboration between Taiwan and Israel industries. ”
- Head of pharma Search & Evaluation, Global BD&L, Novartis, Markus Kalousek
“Taiwan Expo find the approach to facilitate IT, device and pharma industries together to treat the patients in better way.”
- GM of Industry & Distribution Business Unit, Hitachi, Murakami Sei
“Japan and Taiwan and all the Asia countries can collaborate to each other to utilize each country and region strength.”
- GM of Greater China and Vietnam, Teva, Larry Merisalde
“I think Taiwan is ready to take an advantage of new age of Healthcare Treatment.”
- Head of Access to Innovation APAC, Merck, Birgit Reitmaier
- Head, Johnson & Johnson Innovation, Asia Pacific, Dan Wang
- Managing Principal of Medtronic China Venture Fund, Yonghui Shi

2018 Expo Recap

Concurrent Conference

Presentation of RSS 3D Bioprinting Bone Reconstruction Technology

National Applied Research Laboratories Instrument
Technology Research Center

Deloitte Digital X Healthcare innovation forum

Deloitte & Touche

Tri-Creation in Healthcare

Taiwan Hitachi Asia Pacific Co., Ltd

International Symposium of A.I. Healthcare and Minimally Invasive Surgery

Show Chwan Health Care System, Asus Life

Taiwan Functional Agricultural Products Forum-Opportunities and Prospects
in New Agriculture

Cohost by Council of Agriculture Executive Yuan &
Agricultural Technology Research Institute

Non-drug Therapy Trends of Next Century- Bioelectronic Medicine
(Neuromodulation) NeuroBlock: Ultrahigh Frequency Spinal Cord Stimulation
System for Pain Relief by GiMer Medical

GIMER Medical

Wellbeing with technology- innovation, entrepreneurship, and value-add society

Center for Biomedical Industry, National Taipei University of Technology

2018 4th Taiwan Association for Cell Therapy (TACT) Annual Meeting

Taiwan Association for Cell Therapy

NARLabs Medical Devices Accelerator

National Applied Research Laboratories

Presentation & Seminar: Research Results of 2018 Medical Device Industry
Counselling and Promotion Program

Cohost by Industrial Development Bureau, Ministry of Economic Affairs
& Industrial Technology Research Institute

Concurrent Conference

AI for Drug Discovery and Healthcare (U.S.A)

Insilico Taiwan

Yourgene Health beyond NIPT

Yourgene Health

PMI micro imaging technology and medical technology applications

Pioneer Medical Instrument Technology (PMI) Co.,Ltd.

Global Change of Regulations for Regulatory Affairs in electronic Submission Management for API, Generic and Originators (Germany)

EXTEDO GmbH

Antroquinonol - Innovative New Drug Research and Clinical Studies in Cancers and Chronic Diseases

Golden Biotechnology Corp.

Making Data-Driven Medicine a Reality: High Precision in Routine Clinical Diagnostic using SOPHiA (Switzerland)

SOPHiA GENETICS

NARLabs Medical Devices Accelerator

National Applied Research Laboratories

Pioneer of minimally invasive endoscopic surgery

Chia-Yi Christian Hospital

International Symposium on Universal Health Coverage

Taiwan Medical Association

Global trend and treatments for pancreatic cancer

Taiwan SynCore Biotechnology Co., Ltd , Taiwan Pancreas Society, Taiwan Oncology Society

SMART HEALTH TECHNOLOGY

Taipei Medical University Healthcare System

Gut-Microbiota

National Taiwan University Hospital , Research Center for Biotechnology and Medicine Policy

The background of the image is a photograph of a city skyline, likely Taipei, featuring the prominent Taipei 101 skyscraper. The entire image is covered with a semi-transparent purple gradient overlay. The text is white and positioned in the upper left to center area.

CEO Cross-Field Dialogue : Foreseeing Healthcare Advances

Five Senior Executives from Merck (Head of Access to Innovation APAC, Birgit Reitmaier), Teva (GM of Greater China and Vietnam, Larry Merizalde), Hitachi (GM of Industry & Distribution Business Unit, Murakami Sei), Nvidia (VP Sales and GM Taiwan, Eunice Chiu) and Qisda (VP&GM of Medical Devices Group, Harry Yang) have gathered together in Taiwan to conduct cross-field discussion about foreseeing the future of healthcare, opportunity and challenge of cross-industrial collaboration, how to stay innovative, and what is the criteria for ideal partners.

- **Foresee the future: AI and deep learning will be the future milestone in the next five years.**
- **Explore the opportunity: Cross-filed integration of ICT and hospitals to explore endless business opportunities.**
- **How to stand out from cooperation and competition ? [Innovation] is the key.**
- **Connect the ideal partners: Attitude of cooperation is the first priority.**

New Generation: Personalized healthcare, precision medicine and next-generation therapies

Since first reveal of human genetic map and the cost of whole genome sequencing has dropped, the medical efficiency has been greatly improved. Now day, cellular immunotherapy, gene-editing, and personalized medicine are the latest developments across generations. We have Invited Dr. Seigo Izumo (AMED CiCLE Program Director of Takeda Pharmaceuticals), Dr. Wise Young, (Chief Science & Medical Advisor of StemCyte), and other experts to witness the new era of disease treatment through the development of precision medicine.

- Latest clinical and industry development on cellular immunotherapy.
- CRISPR-powered search engine for disease detection
- AI, genomics, and biological information together promote personalized medicine

Medical Revolution: Technology Spurs Transformation of the Medical Industry

Big Data, Artificial intelligent (AI) and blockchain are the latest innovative technologies applied in the medical and healthcare industry. The combination of medical and digitization has become one of leading world trend. In order to promote the cross-field collaboration, Med x Tech Summit Asia (MEDTEX) has invited world-renowned technology companies and smart medical developers to participate in the conference to discuss innovations and challenges brought by the technology of AI, blockchain and electronic medical records. In the meantime, explore the strategies and thinking of industrial innovation transformation.

- Implement artificial intelligent (AI), increase medical efficiency
- Application of blockchain and electronic medical records in the Healthcare.
- Observe the medical digitization: how technologies offer smarter solution to help the transformation of healthcare industry.
- Overview of new strategy and new thinking of global medical innovation.
- Israel government fully support numerous innovation of biomedical technology.
- The Innovative energy from Taiwan, Australia, United Kingdom and United States never fall behind.

➤ 98+ innovative teams from Taiwan and overseas

22 International companies recommended by the Israel Advanced Technology Industries (IATI), Commonwealth Scientific and Industrial Research Organisation (CSIRO), Singapore SGInnovate, the Federation of Thai Industries (F.T.I.), HK Bio-Med Innotech Association plus Microsoft and IBM, together with 30 research institutions, including Taiwan National Health Research Institutes (NHRI), Industrial Technology Research Institute (ITRI), National Taiwan University, National Tsing Hua University, National Chiao Tung University, National Cheng Kung University, etc., have a total of 98 teams.

International leading enterprise showcase:

- Next Generation technology for AI and Big data – United States/Microsoft · IBM
- Pro-Drug technology – Israel /Met Syn Lysine
- The world's first brain rehabilitation VR device for stroke patient – Australia /Neuromersiv
- Develop the latest cancer liquid – Hong Kong/ Phase Scientific
- Surgical robot navigation – Singapore/ NDR Medical Technology

Innovation Salon

Invited Johnson & Johnson Innovation Asia Pacific Innovation Center and Taiwan Capital Management Corporation CEO to share international innovation, entrepreneurship and investment perspectives, and PwC Taiwan, Deloitte & Touche, FOXCONN H. Spectrum to analyze financial, tax, legal and entrepreneurial practices.

DAY1 International Innovation Strategy and Target selection

DAY2 Cross-field innovation among finance, IPO, Fundraising & informative industry

DAY3 Asian biomedical innovative community VS investment perspective

Taiwan: International surgeon training center

“Train the Trainers” in Highly Specialized Surgical Field of Reconstructive Microsurgery

The goal of “train the trainee” is to train these physicians to use the knowledge and technology to serve patients. When the goal upgraded to “train the trainers”, we emphasize the sense of mission and concept. In addition to teaching knowledge and technology for serving patients, these “trainers” can also train other students by delivering knowledge in their particular field, once they return to their own country. - Academician Wei, Fu-Chan

Physicians from overseas pay tribute to Taiwan

- **Austria/ Chieh-Han John TZOU**

Professor and Director of Plastic and Reconstructive Surgery/ Hospital of Divine Savior Vienna; Teaching Hospital of the Medical University of Vienna

- **Canada/ Christiaan Schrag**

Clinical Assistant Professor/ Section of plastic Surgery, University of Calgary

- **Canada/ Amélie Bourget**

Chief of Plastic Surgery Assistant Clinical Professor/ Charles LeMoyne Hospital affiliated to Sherbrooke University

- **Dominica/ Victor Garrido**

Hepato-Pancreato-Biliary and Transplantation Surgeon

- **Italy/ Marco Pappalardo**

Plastic Surgeon at Plastic and Reconstructive Surgery, Department of Surgical, Oncological and Oral Sciences, University of Palermo
PhD Doctoral Course of Oncology and Experimental Surgery, University of Palermo

- **Singapore/ Bien-Keen Tan**

Prof and Head of Plastic, Reconstructive and Aesthetic Surgery Department/ Singapore General Hospital

- **Sweden/ Andres Rodriguez**

Chief and Associate Professor & Director International Fellowship Program in Reconstructive Microsurgery/ Department of Plastic and Maxillofacial Surgery Uppsala University Hospital

- **USA/ Roger K. Khouri**

Founder of Miami Breast Center

- **UK/ Hywel Dafydd**

Consultant Plastic, Hand and Peripheral Nerve Surgeon/ Welsh Centre for Burns & Plastic Surgery; Honorary senior Lecturer, Swansea University

- **UK/ Francesco Mattia Giovanni Riva**

Associate Specialist in Head and Neck Reconstructive Surgery/ The Royal Marsden Hospital NHS Foundation Trust

Taiwan's Top 5 international medical specialties

- Reproductive medicine: artificial reproduction, prenatal genetic screening, frozen eggs
- Orthopaedic: osteosarcoma, biggest bone bank, old humeral head dislocation, kyphosis correction
- Transplantation: liver transplantation, pancreas transplantation, lung transplantation
- Cardiovascular: arrhythmia, cardiac catheterization, minimally invasive heart surgery
- Otolaryngology: artificial cochlear implant
