# Convergence India 2020

*Digital India - Connecting the Unconnected*

PRAGATI MAIDAN, NEW DELHI, INDIA | 19-21 FEBRUARY 2020

Including

**EmbeddedTech**  
**INDIA EXPO**

Telecom | Broadcast | Optical Communications | Internet of Things (IoT) | Embedded Systems | Satcom | Virtual Reality (VR)  
Augmented Reality (AR) | Wearable Tech | Blockchain | Artificial Intelligence (AI) | Machine Learning (ML) | Robotics | Drones  
Mobile Devices & Accessories | Electronic Manufacturing | Digital Media | Incubators | Gaming | Consumer Electronics

# 28<sup>th</sup> Convergence India 2020

Digital India - Connecting the Unconnected

Convergence India expo is India's leading communications, broadcast & media, IT and technology event.

The 28<sup>th</sup> Convergence India 2020 expo is an international platform where exhibitors showcase the latest technologies in the verticals of telecom, broadcast content production, management and delivery; wire & wireless technologies including broadband, 4G / 5G networks, IT solutions like cloud, Big Data & analytics, smart homes, smart solutions, security & surveillance, M2M, IoT, fintech, gaming and many more.

Jointly organised by the India Trade Promotions Organisation (ITPO) and Exhibitions India Group (EIG), the annual expo provides a platform for players to promote Brand India, and extend the impact of 'Make in India' and 'Digital India' campaigns globally.

Living up to expectations, the 28<sup>th</sup> edition of the Convergence India expo will once again bring together professionals, innovators and domestic and international business groups to interact, explore and forge new relationships in one of the fastest growing global markets.

## Communications

# POST SHOW REPORT 2019

India Trade Promotion Organisation (ITPO), the premier trade promotion agency of the Ministry of Commerce & Industry, partnered with the Exhibitions India Group to organise the **27th edition of Convergence India 2019**, along with the Internet of Things India 2019, EmbeddedTech India 2019 and Mobile India 2019 expos. The three-day event that lasted from January 29–31, was inaugurated by Union Minister for Commerce & Industry, **Shri Suresh Prabhu**. It witnessed a record footfall of nearly **22,000 visitors** who came to explore a wide array of products and applications put on display by **664 participants** from **33 countries**.

The event was a reflection of Government of India's '**Digital India**' and '**Make in India**' initiatives as it brought together latest technology innovations and trends from the fields of ICT, IT and ITeS under one roof. On one hand it provided a platform for indigenous players to promote 'Brand India'; and, on the other, opened new business opportunities for overseas exhibitors.

The four expos focused upon technologies and developments in the space of ICT, broadcast & digital media, emerging technologies, cloud & Big Data, virtual & augmented reality,

artificial intelligence, robotics, drones, application development, cloud services, M2M solutions, semiconductor manufacturing, smart technologies for smart cities, mobile applications and related upgrades, and much more. Together, the events provided robust opportunity for professionals, innovators, international businesses, telecom and broadcasting bigwigs, leaders from IT & ICT, as well as angel investors and venture capitalists to interact and do business with each other.

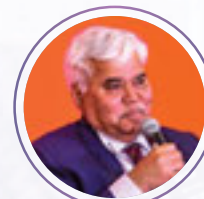

## MESSAGES

*"This event is a true convergence of technologies and companies from around the world coming together to build a new global technology-driven ecosystem. I believe, India has a very important role to play in this new world, not only as a nation capable of adopting new technologies, but also one capable of innovating and producing new technologies."*

**SHRI SURESH PRABHU**

Hon'ble Minister, Ministry of Commerce & Industry and Civil Aviation, Govt. of India

**SHRI R.S. SHARMA**

Chairman, Telecom Regulatory Authority of India

*"India is a country that can lead innovations for solving specific problems. Fibre is just one way and not the only way of establishing connectivity. We need to be open to other channels, be it satellites, cable, or wireless, and work towards developing newer, holistic technologies that overcome existing challenges to building a fully connected nation."*

**SHRI VINAY THAKUR**

Director - Project Development, National eGovernance Division, Ministry of Electronics and IT

*"Good governance through the Aadhaar-enabled Payment System (AePS) has been an area of focus for the government in the last four years. We have transferred up to Rs. 5.6 lakh crore to beneficiaries of NREGA, LPG subsidies, etc. using AePS. In addition, we are facilitating 9.1 crore electronic transactions such as passport services, land records, etc. through the e-governance portal."*

**SHRI VIPIN TYAGI**

Executive Director, C-DOT

*"As a premier telecom R&D centre of the Government of India, we have been steadfast in our commitment towards meeting the diverse communication requirements of the nation. Convergence India was an ideal setting for us to reach out to thousands of visitors and business groups and showcase our indigenously developed telecom technologies and innovative solutions."*

**DR. NEENA PAHUJA**

Director General, ERNET

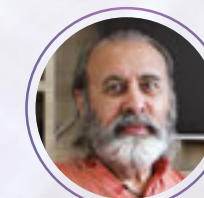

*"Today, the convergence of various telecom channels offer us the chance to deliver enhanced services to consumers. We can use different alternatives like the vast network of power cable lines to send data at nominal speeds to at least provide a basic level of internet connectivity in those areas where broadband or mobile/wireless internet penetration is still very low."*

**SHRI DEEPAK KUMAR**

Executive Director ITPO

*"Interactions and interesting and educational sessions at Convergence India will strengthen and facilitate government and private initiatives in Digital India and Internet of Things."*

**SHRI PREM BEHL**

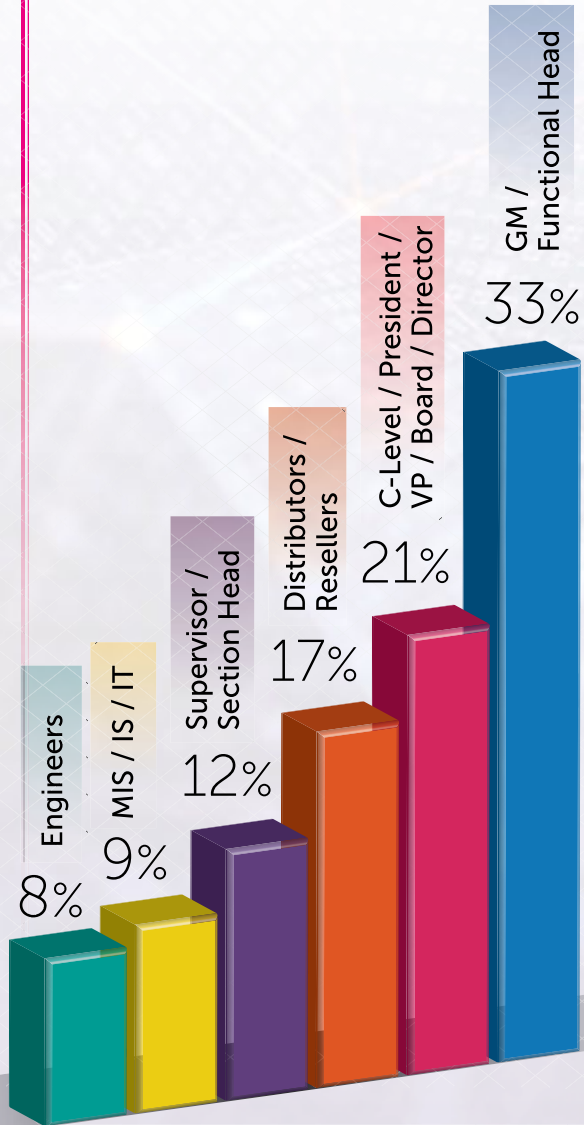

Chairman Exhibitions India Group

*"Technology-enabled innovations like digital payments, hyper-local logistics, analytics driven customer engagement and digital advertisements are the future. At Convergence India, you can experience how IoT, cloud computing & Big Data, artificial intelligence, virtual reality, social media and wearable technologies are shaping numerous industries including education, clean energy, commerce, telecom, financial services, logistics, IT and ITeS, as well as cable, broadcast, satellite and media"*

# TECHNOLOGY PAVILIONS

## Mobile & Accessories

The Mobile & Accessories Pavilion was a key attraction for the walk-in visitors. It showcased latest mobile devices, wearables and accessories that are trending in the domestic and international markets. The setting allowed manufacturers to present their products directly to distributors, retailers and visitors, besides creating a useful networking and business platform for buyers and suppliers.

## Satcom

The Satcom Pavilion exhibited technologies in satellite & telecommunications, transmission systems & equipment, cabling systems, home systems & broadband, broadcast & digital media, carrier ethernet, fibre communications, emerging technologies, content production, management & delivery, 5G, telecom power & systems, etc.

## EmbeddedTech

The EmbeddedTech India expo focused upon products and solutions that empower smart products such as microcontrollers, sensors, RF, motor-control, secure MCUs, and solutions that support smart home, smart industry, and ultimately smart cities.

## Internet of Things

*Internet of Things India Expo seeks to advance India's potential global leadership in IoT and increase the adoption of high quality IoT technologies and services throughout businesses and the public sector.*

The Internet of Things India expo was the focal point for established businesses, start-ups and tech talent with its display of innovations in the field of smart cities, design applications, enablers, industrial IoT, data analytics, AR/VR, AI, blockchain, robotics, and other disruptive technologies. The event attracted 5,373 visitors across 3 days with 95 exhibiting participants, including names such as Google, PTC, Infogain, Airtel, Dell and IBM. The conference,

co-organised with the expo, boasted of informative presentations from leaders of IoT ecosystem including GE Healthcare, SAP, SENRA, Capgemini, Dell EMC, etc. on a range of subjects such as 'Digital India – Connecting the Unconnected', 'IoT empowering the Smart Cities Infrastructure', 'IoT driving Innovation in Automotive & Mobility', 'Role of Cloud & Big Data analysis in Digital Transformation', to mention a few.

The term 'Fintech' encompasses a variety of technological activities such as money transfers, depositing a check with your smartphone, physically bypassing the bank to apply for credit, raising money for a business start-up, or managing your investments without the assistance of a person. Today, fintech innovations impact traditional trading, banking, financial advice and products. Acknowledging the growing influence of Fintech in our daily lives, organisers India Trade Promotion Organisation (ITPO) and Exhibitions India Group (EIG) announced the inclusion of the **Fintech India expo** in the 28th edition of the Convergence India expo, to be held from 19 -21 February, 2020. The expo will display applications and innovations in fields such as cryptocurrency, e-wallets, mobile banking and smartphones, cyber security and electronic trading. Also showcased will be latest developments in risk management, financial/capital markets, start-ups/financial investors, banks/insurance and much more.

Gamethon Expo will give you an unforgettable experience in global trends, business opportunities and investment options. It is a unique platform for launching games and a perfect arena for developers to showcase their work. Gamethon brings the gaming industry together into one chaotically-fun experience that only the legendary gamers can provide. It's a unique combination of all things geek, nerd and gaming that takes place in an environment where creativity thrives. Estimates suggest that India's mobile games market will be worth \$1.1 billion, and number of users projected to become 628 million by 2020.

## Knowledge Paper

International market research and consulting company MarketsandMarkets, in partnership with Exhibitions India Group, released a knowledge paper titled **"Internet of Things: The Next-Gen Revolution in India"**. The paper talks about the dramatic developments taking place in IoT in the country. It offers in-depth analysis of how India is moving towards a digital economy, which is not only modernising industries

and increasing mobile and Internet penetration, but also increasing the number of skilled workforce and streamlining operations in companies. The document also discusses the growth trajectory of India's telecom sector and explores reasons for increasing mobile and Internet penetration among masses.

"As a privileged partner of Convergence India 2019, MarketsandMarkets is honoured

at the opportunity for furthering the event's value proposition. Drawing from our thousands of deeply researched reports, we will shine the light on the most relevant trends and disruptions prevalent in telecom, media and IoT. We will present crucial insights on the above three, including their current dynamics, in terms of both the market and undergirding technologies; and meticulous prognoses for six years down the line," said Sachin Garg, Associate Vice President, Emerging Technologies, MarketsandMarkets.

# INNOVATIVE PRODUCTS

## Life rescue Robot for people working in mining industries

The mining industry can be prone to accidents such as release of poisonous gases. This can lead to an incident where workers could lose consciousness or die at site even before help reaches them. Students from the Department of Electrical & Electronics Engineering of the PVP Siddhartha Institute of Technology, Vijayawada, Andhra Pradesh, have designed a robot that can be used to provide immediate assistance to such workers.

The robot is controlled using Internet of Things - the operation uses node MCU. It

has a camera fitted that is used to monitor the path of the robot till it reaches the injured person. The node MCU sends this data from the camera to the cloud, which enables the operator to see everything on a monitor at his end. The other function of node MCU is to collect data from the cloud and give commands to the robot as per given input. Based on information provided, it administers an antidote through an injection to the injured worker. While the robot is still a prototype, it can be utilised to administer treatment to injured people in other hazardous industries as well.

## Zebronics: Delivering innovative solutions

Indian company Zebronics, known for its IT & gaming peripherals, sound systems, mobile & lifestyle accessories, as well as surveillance solutions, put on display an affordable range of premier series, AV, computer peripherals, accessories and surveillance devices that attracted many visitors. The Zebronics Rover is a wireless speaker built into the side of a 400 ml water bottle, which also supports a micro SD as well as a compass. Portable wireless speaker Zeb Atom comes with a warm glow of 60 LEDs, giving a burning candle effect. The speaker supports BT/

mSD and comes with rechargeable battery. A handy portable wireless speaker called Zeb Glory comes in a nice wooden finish. It has ample multi-connectivity options like BT/ FM/Micro SD.

## Robotek Batteries: Sleek devices for the nextgen

Robotek Batteries Pvt. Ltd. is a well-known name in the market for its complete range of innovative products, especially mobile batteries. The company put on display some sleek looking devices that got the attention of many youngsters. The SC 104 3.4A dual USB port car charger is a high efficiency USB charging device that is compatible with Apple products, android and various digital devices. The Stereo Handsfree boasts of superior surround-sound, while giving you a choice of three sizes of ear tips for a comfortable listening experience. Its one-button universal remote with mic allows you to

answer and manage calls effortlessly with the touch of a button. The 10,000mAh power bank has an input of 5V 2.0A micro USB and an output of 5V 2.4A.

## 01 uMobility

Communication support software specialist, Primea Systems unveiled its real time communication (RTC) and analytics solutions – uMobility Cloud, at the event. uMobility Cloud software solutions help not only meet the global communication needs of the client, but also empower apps and websites for communication through unique API enabling analytics and artificial intelligence (AI) knowledge base. BizRTC Pay as you Go pricing combined with modular uMobility solutions allows you to pick and choose the component of the solution that fits your needs. The solutions are supported on Android, iOS, MacOS and Windows, allowing businesses to select uMobility for multiple device/OS choice versatility, global availability and flexibility in solution components, deployment, payment and more.

## 02 'Mei' for Elderly Care

India-based start-up Lyle Technologies launched its first product "Mei", especially designed for elderly care. Mei is a fall detection device, which senses a tumble or fall, and sends SMS to the pre-configured numbers of the family or caretaker. This way they are immediately informed that the user has fallen down at a certain location. Mei is a stand-alone device that does not require the user to carry a smartphone with them. Also, it is 'on

demand', which activates only when there is an emergency and sends out the GPS location of the person under distress. The device also has an 'SOS' button, which the user can press to initiate an emergency message otherwise too.

## 03 FOS-3114 Fibre Access Switch

Fibre optic communication solutions provider, Connection Technology Systems (CTS) launched the new FOS-3114, a 14-port L2+ Fibre Access Switch for its domestic-use micro fibre connectivity solution. Collaborating with the FOS-3110 on confronting the emerging challenges of deploying FTTH/FTTB, FOS-3114 is a tailor-made access switch, designed to fulfil the requirements of small and medium-sized apartments/buildings. Its fan-less design eliminates any complaints about noise and ensures a longer lifespan. It is the best-in-class, noise-free solution for telecoms, network operators, and systems integrators to optimise the implementation of FTTH/FTTB deployments.

## 04 SWISSVOICE Products for Senior Citizens

SWISSVOICE, provider of smart technology-driven mobile phone terminals, showcased a wide range of user-friendly products that simplify senior care and communication for

seniors. The products come with unique features and interfaces for both seniors and care givers to monitor alerts and emergency assistance, thus establishing a valuable family link. The company's products are available in 2G, 3G and 4G LTE variants. Its premium services also include a dashboard feature on web browsers and mobile phones for care givers. In addition, features like remote configuration, burst call, burst video, health monitoring, video monitoring, etc. are also available on its 4G LTE phones.

## 05 Koncor JV unveils Telecom & Smart Solution Products

Koncor Labs, a joint-venture between Indian company Corpus and China-based Konka, unveiled a range of telecom and smart solutions products that will bring value to businesses and digital consumers. The product line-up includes the ATV STB solution, Hybrid ATV STB, Triple play Combo Box, Smart TV & home devices, and IoT based Smart solutions.

# CONFERENCE PROGRAMME

28  
CONFERENCE  
SESSIONS

6  
WORKSHOPS

182  
SPEAKERS

## Day 1

- **Opening Ceremony**
- **Inaugural Session:** Digital India - Connecting the unconnected
- Press conference for Computex (TAITRA)
- **Future of digital content:** Rise of social platforms and viewership
- **Vision 2020** - Making India ready for 5G adoption
- Monetisation strategies for OTT in 2019
- Electronics manufacturing in India - Challenges to accelerate its success
- Demystifying the potential of Artificial Intelligence & IoT
- Digital Communication-Telco's advantage in IoT

## Day 2

- **OTT partnerships:** Opportunities & challenges
- **Fintech:** Mobile and digital banking changing the face of money
- Start-ups strengthening the nation with digital innovation
- **Digital transformation in India:** Progress & challenges
- **Migration to IP:** The big paradigm shift
- Trends in Embedded systems industry and its impact on electronics manufacturing

- Sessions by Ministry of MSME - Ministry of MSME schemes for MSME sector
- Financial assistance & credit facility to MSME sector
- Scaling-up of Nextgen IoT products - Is it a good news for Embedded systems industry?
- IoT empowering Smart Cities Infrastructure
- **CXO Forum:** Industry 4.0: Innovation through digital collaboration
- Protecting IoT from new threats of connected reality
- Promoting skill development & entrepreneurship for the next digital transformation
- Blockchain for better Governance

## Day 3

- **Broadband:** A highway for inclusive and sustainable growth in India
- **CXO forum:** Cybersecurity/ Cybercrime: Breaching data is a reality. What is the way ahead?
- **Bridging the divide:** Future of broadband connectivity & cable TV networks
- Role of Cloud & Big Data analysis in digital transformation
- Sessions by Ministry of MSME - Vendor registration &

- procurement process of Engineers India Ltd. (EIL)
- Vendor registration & procurement process of Bharat Electronics Ltd. (BEL)
- IoT's potential in healthcare disruption
- IoT driving innovation in automotive & mobility

# FACULTY

TESTIMONIALS

TIEN CHUNG-KWANG  
Taiwan Ministry of Finance

"India is a fast-growing economy, with a growth rate that is the highest in the world. We are trying very aggressively to develop economic ties with India, and Convergence India 2019 has been a remarkable platform to communicate our ideas and network with participants from the industry. This platform has always been fruitful to us for building some strong partnerships."

SAIMA ANSARI  
Zebronics

"This event gave us a platform to display our core product line to a diverse audience. As a result, we have made new business contacts and rekindled old relationships. It also allowed us to review what our competition has to offer, which will be key to our future plans."

ANSHUL GUPTA  
Engineering Student

"Attending the expo helped me realise how vast IoT is. I am most eager to now be part of this and probably stand here as an exhibitor in a few years' time."

RANJEET KOUL  
VP & Country Head - APAC & MEA, Aeris Communications

"IoT presents us the greatest opportunity to evolve the basic citizen services in the field of health, agriculture and other verticals. But at the same time, the technology poses a challenge with respect to the skills needed by the next generation workforce. At Aeris we realised the potential of IoT to enable the services in multiple sectors and have already started to monetise it. At the same time, we understand the huge skill gap that needs to be bridged. The Aeris IoT Centre of Excellence in universities is our initiative towards skill development and capacity building for IoT in India."

RAJEEV GOYAL  
Managing Director, Cloud Infotech Pvt. Ltd.

"Convergence India is a great platform for the VOIP/UC segment of telecom sector to showcase and offer telecom solutions and products. Cloud Infotech benefits immensely by participating at the event due to its offering of converged solutions of different VOIP products under a single roof. The event has always helped cloud infotech create identity, brand and boost up sales every year."

NARENDRA SHAH  
Entrepreneur

"This year has been an excellent mix of technologies, which gave us the opportunity to explore multiple options to suit our business needs."

JUERGEN HASE,  
CEO, Unlimit IoT Pvt. Ltd.

"In present times, innovation is the only way forward for organisations, especially those that lack technical know-how and human resources to facilitate this change. This has given rise to the need for collaboration with suitable partners that have relevant technological expertise. An event such as Convergence India helps us to reach out to such companies and forge collaborations with multiple players that culminate into long-term relationships."

GAURAV NEWATIYA  
Business Analyst

"Convergence offers an ideal platform to interact with the top-most and best in the industry. It also gives us a chance to participate in some invigorating discussions through the medium of conferences and workshops."

ABHISHEK DUBEY  
Senior Manager-  
Marketing

"I have been to a number of technology expos, but the quality of the exhibits at Convergence India has been most remarkable."
