

Frontiers of Europe: FinTech Opportunities in Central & Eastern Europe

FinTech has been a hot button topic in recent years due to the growth of online shopping, move towards cashless payments and the growing needs of business in real-time payment even at brick-and-mortar businesses, further accelerated by COVID.

While Singapore has been at the forefront of FinTech in the APAC region, Central & Eastern European FinTech companies have been making waves on the other side of the world. The synergy to leverage on each other to create a region-to-region FinTech ecosystem is clear. Come hear from the business leaders behind the growth from both regions to discover how we can build the future of FinTech together.
