Polish Construction Building the Future

Poland is shaping the future of construction in Europe and beyond. As the 6th largest construction market in the EU, the Polish sector combines scale, innovation, and global ambition.

What Makes Polish Construction Stand Out?

Strategic Scale within Europe

- Poland has the **6th largest construction sector** in the EU
- It accounts for **11% of all EU construction firms** and **6–8% of EU industry turnover**

Skilled and Competitive Workforce

- Over 1.3 million people work in construction in Poland – around 6–8% of the total workforce
- Polish specialists are renowned for technical proficiency, reliability, and professionalism

Attractive Value for Money

- Competitive labor and material costs deliver high quality at optimal prices
- Strong export performance underscores international trust in Polish standards

Innovation and Eco-Responsibility

A leader in eco-innovative solutions, including:

- Composite materials made from recycled PET
- Energy-saving prefabricates and passive housing technologies
- Smart building systems for sustainable urban development

Excellence in Windows & Doors

in 2023, Polish companies contributed

- **36% of EU wooden window exports**
- **53% of EU PVC window and door exports**
- **These products are shipped to over 100 countries worldwide**

Strong Future Growth Outlook

- A 3.5% compound annual growth rate in construction output forecast for 2025–2028
- Driven by investment in transport and renewable energy infrastructure

Proven Track Record Globally

- Polish firms participate in infrastructure projects from metro systems in Asia to bridges and utilities across Europe
- Modular construction from Poland features in hotels, residences, and public buildings across Europe, North America, and Africa

Discover the potential.
Build with Poland !

Polish Construction Building for the World

■ **Polish construction know-how is trusted worldwide.**
From modular buildings in the United States and Africa to large-scale infrastructure in Europe and Asia, Polish contractors bring:

- Innovation in modular construction – shaping modern skylines from New York to Kampala
- Expertise in complex infrastructure projects – railways, metros, bridges, and treatment plants across multiple continents
- Prestige in high-end construction – building iconic residences and palaces using Polish green tech.

■ **Did You Know?**

- Polish technology has been used in royal palaces, student campuses, and world-first modular skyscrapers
- The country is home to world-leading exporters in windows and doors, with multi-billion-euro annual exports
- Eco-innovation is not a trend but a standard – and a fast-growing business driver

Support Ecosystem That Builds Success

■ **Polish Construction Cluster**

The largest construction cluster in Poland, with 400+ member companies, the Polish Construction Cluster promotes collaboration between industry, academia, and R&D. More at: www.polskiklaster.pl

■ **Polish Association of Construction Industry Employers (PZPB)**

Representing over 80 of Poland's top construction firms, PZPB engages in advocacy, legal consultation, and international cooperation. It also organizes training and industry conferences. More info : www.pzpb.com.pl

COMPANY NAME:

Apator Powogaz S.A.

WEBSITE:

www.apator.com

PRODUCTS:

- water meters,
- heat meters,
- heat cost allocators,
- communication modules,
- software.

CERTIFICATES:

MID, KIWA, DVGW, ACS, WRAS

**PRESENCE IN

International trade and distribution

YEAR OF ESTABLISHMENT:

1998

NUMBER OF EMPLOYEES:

3500

Pronar was founded nearly 30 years ago and currently employs over 3,000 people. Its nine modern production facilities — covering an area equivalent to more than 90 football pitches and processing over 10,000 tons of steel each month — make Pronar a powerhouse of manufacturing capacity. Today, Pronar is the undisputed leader in the Polish market for the production and sale of machinery and equipment for agriculture, municipal services, and the transportation industry, with a market share approaching 50%.

The company is also a global player in the manufacturing of wheels for agricultural and municipal machinery, pneumatic and hydraulic systems, trailer axles, steel profiles, and plastic components.
