

The preparations for

Jubilee 50th International Building Trade Fair SEEBBE 2026

the biggest civil engineering trade fair in the Southeast Europe Region, are underway.

Why SEEBBE?

SEEBBE is business oriented and interactive
SEEBBE is practically oriented and innovative
SEEBBE is international
SEEBBE is inspiring
SEEBBE is oriented to the future!

The exhibiting product range includes all sections of construction activities: research and design, construction and maintenance of facilities, high construction, ground level construction, state of the art materials, construction machines, devices and tools, information technologies, state of the art construction systems, facility and interior space fitting.

New investments in the region, as well as technological innovation launching, especially those related to the sustainable construction, energy efficiency and the efficiency of the resource use, impact to the environment and human health, the future materials and processes attract many visitors interested in the commercial and residence construction and interior works, both for the new construction and renewal and modernizing.

Civil engineering future is the future of your success!

Use all advantages of the powerful trade fair network for your success and book your exhibiting space at the trade fair SEEBBE 2026 in due course.

The exhibiting space allocation will begin on December 2, 2025. Be part of the event that connects!

WELCOME!
